

Fertilizer

*Nutrition &
Protection*

CIBA 12-12-12

NPK 12-12-12

is a homogeneous liquid fertilizer that contains balanced proportions of major elements essentials to the nutrition and protection of various crops.

Composition:

N: 12%

P: 12%

K: 12%

Fertilizer

*Nutrition &
Protection*

CIBA 12-12-12

NPK 12-12-12

Doses :

Foliar spray :
1L/600 L of water

Ground Fertilization :
6 L / Hectare

- A homogeneous liquid fertilizer that contains balanced proportions of major elements.
- IT is easily absorbed by the plant through the roots or by spraying the leaves.
- IT helps the plant to form chlorophyll, which is very important for vital processes and vegetative growth due to its high nitrogen content
- IT works on the formation of roots and increase the rate of flowers because it contains phosphorous element
- IT helps in scaling fruits and improves marketing specifications by increasing the proportion of sugar (potassium content)
- IT plays an important role in stimulating plant enzymes, making it suitable for all ages of plants
