Public Health

Insecticide

DELTA KILL 25 EC

CRAWLING
INSECTS

FLYING
INSECTS

Method of use:

Controls all kind of flying and crawling insects

Dilute 1 to 2L of CIBA DELTA KILL in 50L of water to cover 300m²:
The diluted solution must be used quickly (does not keep). Usable
at 1% in thermal fogging.

Spray using a directional jet device on the walls of premises to be
disinfected, until light flow. Let dry. To have a better residual effect,
avoid the use of detergent on treated surfaces after application.
