(SL)

Herbicide

## GLYPHOSATE 360 SL

### Method of use:

- Spray before planting in cotton field, forage, sugarcane, wheat, barley, peanut, oat and maize crops.
- Directed spray between Vineyards, stone fruit trees, olive trees, citrus trees and fruit trees.
- Control weeds in irrigation and drainage canals.

Weeds	Rate of use
Bermuda grass, Johnson grass, purple mitsedge, Cogon-grass, Perennial ryegrass, etc...	6-10 L / ha (when weeds are 30-50 cm in height)
Shrubs, Cynodon dactylon, Convolvulus arvensis, Sorghum halepense, etc...	7-12 L/ ha

### Application:

For the recommended dose usage, use 250-500 Liters of water / Hectare. If weeds are dense-grown use up to 600 liters. Don't exceed this volume as it could affect the performance of the product.
