POTASSIUM HUMATE 10% Powder

It is a high-quality plant growth stimulant and soil conditioner, extracted from highly active leonardite; it is applied on all agricultural and horticultural crops by soil and foliar application.

It can be used alone or mixed with most fertilizers.

Composition:
Potassium K₂O 10%
Powder
Flake
Crystal

Fertilizer

*Nutrition &
Protection*

POTASSIUM HUMATE 10% Powder

- It helps chelating micro-nutrients and absorbing macro-nutrients when mixed with them in the fertilizer solution, which help plants benefit the most of these nutrients usually not readily available.
- It accelerates the formation of pigments necessary for metabolism which increases the chlorophyll content of the leaves, activates metabolism and increases its rate.
- It improves soil properties and makes it ideal for planting when mixed with it or when used with irrigation water.
- It contains potassium in concentrations needed by the plants so it can be used preventive and therapeutic in cases of potassium deficiency.
- It controls the ability of the plant to exchange positive ions (cations) and therefore increases the plant's ability to retain water and fertilizer elements..

Dosage:

Can be applied to all Crops:

Fruiting vegetable (tomato, eggplant, pepper...), Potato, Cucumber, melons.

Pome fruit, Stone fruits, Citrus, Olive, Grapes, Field crops and Ornamentals..

Foliar Spray 300 grs/ 200 Litre water

Soil Fertiligation: 2.38- 3.57-Kg / Ha
