

Suspension
Fertilizer

CIBAMAX

Zn Top

Nutrition & Protection

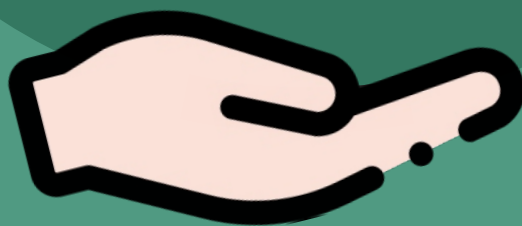

Superior quality water soluble suspension fertilizer, containing high Zinc concentration and a natural biostimulant derived from seaweed. It is used for seed treatment. The optimum level of zinc provides protein and enzyme production as for the seaweed, it stimulates rapid root development.

The dual composition allows the crop to rapidly take up water and nutrients.

Composition:

Zn: 40.5%

Natural bio-
stimulant: 20%
