CIBA ABAMECTIN 18 EC

A translaminar emulsifiable concentrate insecticide and acaricide acting as a direct contact and stomach poison for the control of red mites, American leafminer and thrips on a wide variety of crops.

Active Ingredients: Abamectin 1.8%
Product Type: Emulsifiable Concentrate (EC)

CIBA ACEQUINOCYL 164 SC

Acaricide and Insecticide for the control of two-spotted spider mite (*Tetranychus urticae*) and fruit tree red spider mite (*Panonychus ulmi*) in pome fruit and stone fruit.

Active Ingredients: Acequinocyl 16.4%
Product Type: Suspension Concentrate (SC).

CIBA ALPHA-CYPERMETHRIN 100 EC

An Insecticide for the control of certain pests in a wide variety of crops.

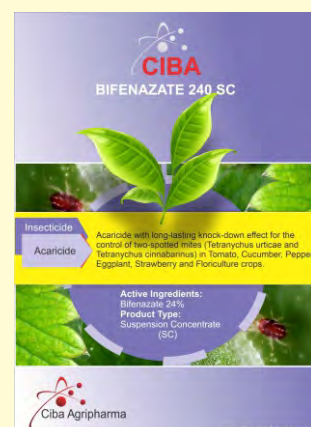

Active Ingredients: Alpha-cypermethrin 10%
Product Type: Emulsifiable Concentrate (EC)

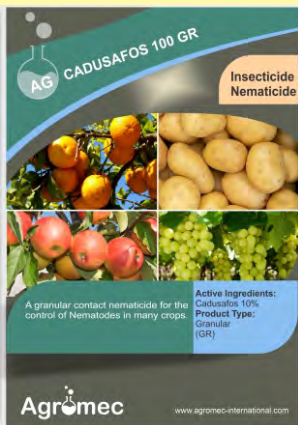

CIBA BIFENAZATE 240 SC

Acaricide and Insecticide with long-lasting knock-down effect for the control of two-spotted mites (*Tetranychus urticae* and *Tetranychus cinnabarinus*) in Tomato, Cucumber, Pepper, Eggplant, Strawberry and Floriculture crops.

Active Ingredients: Bifenazate 24%
Product Type: Suspension Concentrate (SC)

CIBA CADUSAFOS 100 GR

A granular contact nematicide for the control of Nematodes in many crops.

Active Ingredients: Cadusafos 10%
Product Type: Granular (GR)

CIBA CHLORANTRANILIPROLE 200 SC

A Broad-spectrum insecticide and larvicide with stomach and contact action for the control of various insect pests in table grapes, citrus and peaches, potatoes and tomatoes.

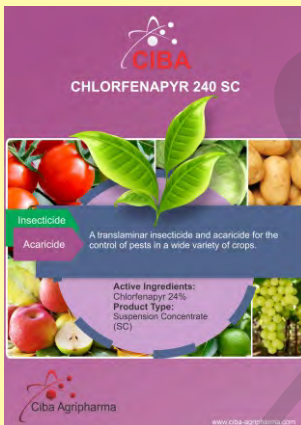

Active Ingredients: Chlorantraniliprole 20%
Product Type: Suspension concentrate (SC)

CIBA CHLORFENAPYR 240 SC

A translaminar insecticide and acaricide for the control of pests in a wide variety of crops.

Active Ingredients: Chlorfenapyr 24%
Product Type: Suspension Concentrate (SC)

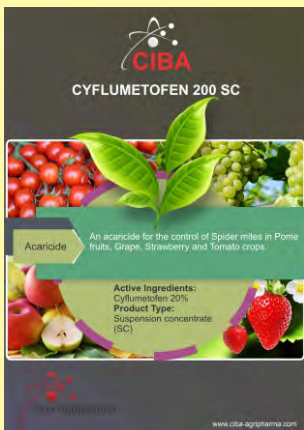

CIBA CLOFENTEZINE 500 SC

An acaricide for the control of Red spider mites in Apples and Pears.

Active Ingredients: Clofentezine 50%
Product Type: Suspension concentrate (SC)

CIBA CYFLUMETOFEN 200 SC

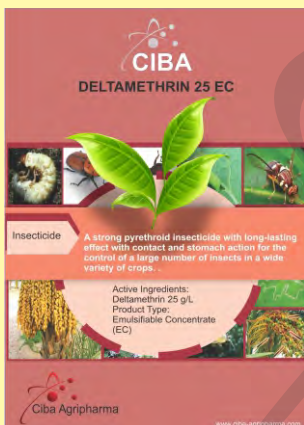

An acaricide for the control of Spider mites in Pome fruits, Grape, Strawberry and Tomato crops.

Active Ingredients: Cyflumetofen 20%
Product Type: Suspension concentrate (SC)

CIBA DELTAMETHRIN 12.5 G/L ULV

A potent insecticide for the control of foliar insect pests such as Dubas bugs, Locusts and grasshoppers.

Active Ingredient: Deltamethrin 12.5 g/L
Product Type: Ultra Low Volume (ULV).

CIBA DELTAMETHRIN 25 EC

A strong pyrethroid insecticide with long-lasting effect that has contact and stomach action for the control of a large number of insects in a wide variety of crops.

Active Ingredients: Deltamethrin 25 g/L
Product Type: Emulsifiable Concentrate (EC)

CIBA DINOTEFURAN 200 SG

A systemic and translaminar insecticide for foliar insect control on vegetable transplants grown in enclosed structures.

Active Ingredients: Dinofeturan 20%
Product Type: Water soluble granules (SG))

CIBA ETOXAZOLE 110 SC

An acaricide for the control of Spider mites in Pome and stone fruits, Grape, Citrus and Tomato crops.

Active Ingredients: Etoxazole 11%
Product Type: Suspension concentrate (SC)

CIBA FENAMIPHOS 400 EC

A systemic emulsifiable concentrate Nematicide and insecticide for the control of Nematodes.

Active Ingredients: Fenamiphos 40%
Product Type: Emulsifiable Concentrate (EC)

CIBA FLONICAMID 500 WG

An insecticide for the control of aphids in Potatoes, vining Peas and Cereals, and for the control of aphids and whiteflies in Cabbage, sugar Beets and fodder Beets.

Active Ingredients: Fosthiazate 10%
Product Type: Granules (GR)

CIBA FLUBENDIAMIDE 480 SC

An insecticide with a unique mode of action targeting insect's muscle, for the control of various Lepidopteran pests in a wide variety of crops.

Active Ingredients: Flubendiamide 48%
Product Type: Suspension Concentrate (SC)

CIBA FOSTHIAZATE 100 GR

A contact insecticide/ nematicide for the control of cyst nematode in Potatoes.

Active Ingredients: Fosthiazate 10%
Product Type: Granules (GR)

CIBA HEXYTHIAZOX 250 SC

Acaricide with ovicidal and larvicidal action, effective with contact and ingestion, in fruit, vegetable and ornamental crops.

Active Ingredients: Hexythiazox 25%
Product Type: Suspension Concentrate (SC)

CIBA IMIDACLOPRID 350 SC

A systemic suspension concentrate insecticide for the control of various insect pests in a broad range of crops.

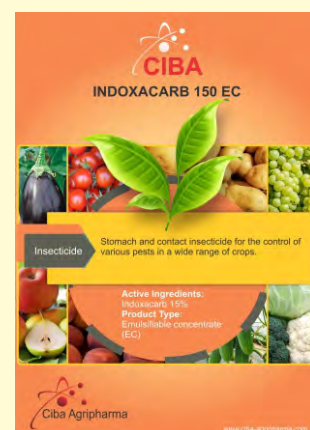

Active Ingredients: Imidacloprid 35%
Product Type: Suspension Concentrate (SC)

CIBA INDOXACARB 150 EC

A Stomach and contact insecticide for the control of various pests in a wide range of crops.

Active Ingredients: Indoxacarb 15%
Product Type: Emulsifiable concentrate (EC)

CIBA METHOXYPENOZIDE 240 SC

New Pyrethroid insecticide for the control of lepidopteran larvae in Tomato, Eggplant, Potato and Pepper crops.

Active Ingredients: Methoxyfenozide 24%
Product Type: Suspension Concentrate (SC)

CIBA OXAMYL 100 GR

An Insecticide and Nematicide for the protection against Root Knot Nematode in Potatoes and Tomatoes.

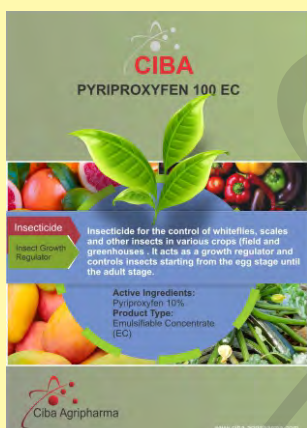

Active Ingredients: Oxamyl 10%
Product Type: Granules (GR)

CIBA PYRIPROXYFEN 100 EC

Insecticide for the control of whiteflies, scales and other insects in various crops (field and greenhouses). It acts as a growth regulator and controls insects starting from the egg stage until the adult stage.

Active Ingredients: Pyriproxyfen 10%
Product Type: Emulsifiable Concentrate (EC)

CIBA SPINOSAD 240 SC

A biological insecticide with contact and stomach action, it has ovicidal effects against many insect pests in a wide range of crops.

Active Ingredients: Spinosad 24%
Product Type: Suspension Concentrate (SC)

CIBA SPINOSAD 480 SC

A biological insecticide with contact and Stomach action, it has ovicidal effects against many insect pests in a wide range of crops.

Active Ingredients: Spinosad 48%
Product Type: Suspension Concentrate (SC)

CIBA SPIRODICLOFEN 240 SC

A broad Spectrum acaricide and insecticide with outstanding control of all important mites in all developmental stages including eggs.

Active Ingredients: Spirodiclofen 24%
Product Type: Suspension concentrate (SC)

CIBA SPIROMESIFEN 240 SC

Acaricide and insecticide for the control of mites and whiteflies on field, vegetable and fruit crops.

Active Ingredients: Spiromesifen 24%
Product Type: Suspension concentrate (SC)

CIBA SPIROTETRAMAT 240 SC

Broad-spectrum insecticide for the control of many pests in a wide variety of vegetable and fruit crops.

Active Ingredients: Spirotetramat 24%
Product Type: Suspension Concentrate (SC)

CIBA SULFOXAFLOL 120 SC

A Fast-acting insecticide from a new class of chemistry that controls sap-feeding insects, such as tarnished plant bugs and aphids on a wide range of crops.

Active Ingredients: Sulfoxaflor 12%
Product Type: Suspension Concentrate (SC)

CIBA CARBENDAZIM 500 SC

A systemic fungicide for the control of black spot in Citrus and Botrytis in Table Grape.

Active Ingredients: Carbendazim 50%
Product Type: Suspension Concentrate (SC)

CIBA CHLOR-M 536.3 SC

A broad-spectrum fungicide for the control of many fungal diseases on Potato, Brussel Sprouts, Cauliflower and Broad Beans.

Active Ingredients: Chlorothalonil 50% +Metalaxyl-M 3.63%
Product Type: Suspension concentrate (SC)

CIBA CHLOROTHALONIL 720 SC

A broad-spectrum fungicide for the control of many fungal diseases on Tomato, Pepper, Cucumber, Cauliflower, Carrot, Potato, Grape, Peach and other crops.

Active Ingredients: Chlorothalonil 72%
Product Type: Suspension concentrate (SC)

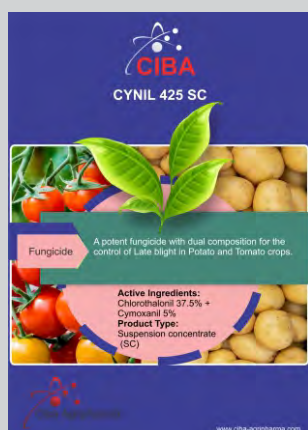

CIBA COPPER OXYCHLORIDE 850 WP

A broad-spectrum fungicide for the control of many fungal diseases on a wide variety of crops.

Active Ingredients: Copper oxychloride 85%
Product Type: Wettable Powder (WP)

CIBA CYNIL 425 SC

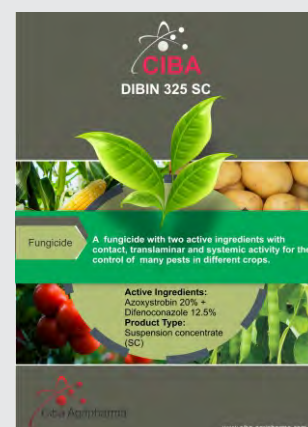

A potent fungicide with dual composition for the control of Late blight in Potato and Tomato crops.

Active Ingredients: Chlorothalonil 37.5% + Cymoxanil 5%
Product Type: Suspension concentrate (SC)

CIBA DIBIN 325 SC

A fungicide with two active ingredients with contact, translaminar and systemic activity for the control of many pests in different crops.

Active Ingredients: Azoxystrobin 20% + Difenoconazole 12.5%
Product Type: Suspension concentrate (SC)

CIBA FLUX 625 WG

For the control of Botrytis in Blackcurrants, Bulb Onions and Grapes; Botrytis and Anthracnose in Blueberries and Anthracnose and Rhizopus in Strawberries.

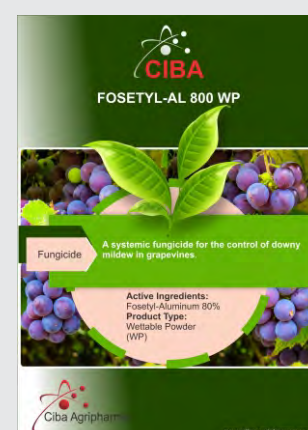

Active Ingredients: Cyprodinil 37.5% + Fludioxonil 25%
Product Type: Water dispersible granules (WG)

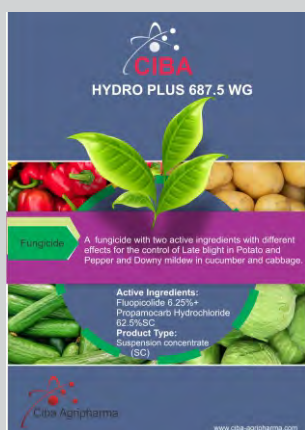

CIBA FOSETYL-AL 800 WP

A systemic fungicide for the control of downy mildew in grapevines.

Active Ingredients: Fosetyl-Aluminum 80%
Product Type: Wettable Powder (WP)

CIBA HYDRO PLUS 687.5 SC

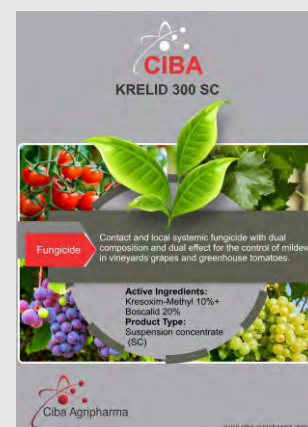

A fungicide with two active ingredients with different effects for the control of Late blight in Potato and Pepper and Downy mildew in cucumber and cabbage.

Active Ingredients: Fluopicolide 6.25%+ Propamocarb Hydrochloride 62.5%
Product Type: Suspension concentrate (SC)

CIBA KRELID 300 SC

Contact and local systemic fungicide with dual composition and dual effect for the control of mildew in vineyards grapes and greenhouse tomatoes.

Active Ingredients: Kresoxim-Methyl 10%+ Boscalid 20%
Product Type: Suspension concentrate (SC)

CIBA KRESOXIM-METHYL 500 WG

A contact and translaminar fungicide for the control of certain fungal diseases in Apple and Pear, Citrus, Grape and Mango.

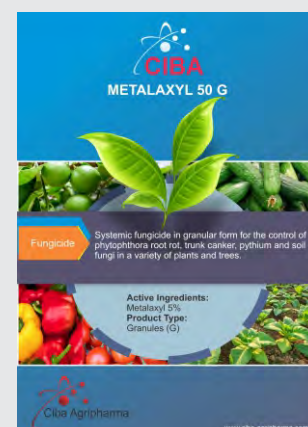

Active Ingredients: Kresoxim-methyl 50%
Product Type: Water Dispersible Granules (WG)

CIBA METALAXYL 50 G

A Systemic fungicide in granular form for the control of phytophthora root rot, trunk canker, pythium and soil fungi in a variety of plants and trees.

Active Ingredients: Metalaxyl 5%
Product Type: Granules (G)

CIBA PENCONAZOLE 200 EW

A systemic fungicide for the control of Powdery mildew and Scab on Apples and Pears, Grapes, Cucurbits and Peas.

Active Ingredients: Penconazole 20%
Product Type: Emulsion oil in water (EW)

CIBA PRO 525 WG

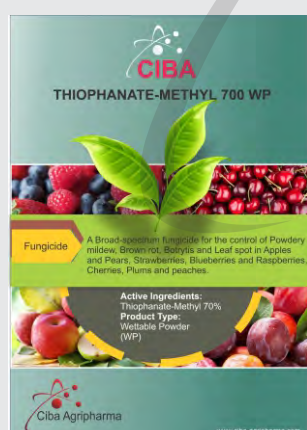

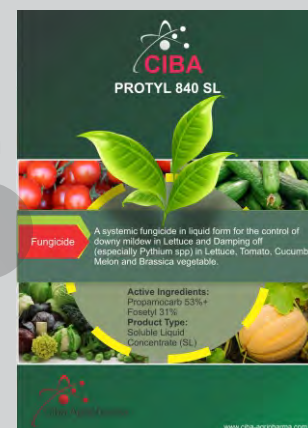

Organic preventive and curative fungicide (water dispersible granule) for the control of downy mildew in wine and table grapes.

Active Ingredients: Cymoxanil 30%+ Famoxadone 22.5%
Product Type: Water dispersible granules (WG)

CIBA PROTYL 840 SL

A systemic fungicide in liquid form for the control of downy mildew in Lettuce and Damping off (especially Pythium spp) in Lettuce, Tomato, Cucumber, Melon and Brassica vegetable.

Active Ingredients: Propamocarb 53%+ Fosetyl 31%
Product Type: Soluble Liquid Concentrate (SL)

CIBA THIOPHANATE-METHYL 700 WP

A Broad-spectrum fungicide for the control of Powdery mildew, Brown rot, Botrytis and Leaf spot in Apples and pears, Strawberries, Blueberries and Raspberries, Cherries, Plums and peaches.

Active Ingredients: Thiophanate-Methyl 70%
Product Type: Wettable Powder (WP)

CIBA TRIFLOXYSTROBIN 500 WG

A broad-spectrum fungicide for the control of certain diseases in Grapes, Stone fruits, Cherries and wheat crop.

Active Ingredients: Trifloxystrobin 50%
Product Type: Water dispersible granules (WG)

12

CIBA TRIZOLE 750 WG

A systemic broad-spectrum fungicide with new combination of two active ingredients that have protective and curative action.

Active Ingredients: Tebuconazole 50% + Trifloxystrobin 25%
Product Type: Water dispersible granules (WG)

CIBA CLETHODIM 120 EC

A selective post-emergence herbicide used to control annual and perennial grasses in a wide variety of broad-leaf crops.

Active Ingredients: Clethodim 120 g/L
Product Type: Emulsifiable Concentrate (EC)

CIBA CLODINAFOP-PROPARGYL 240 EC

A selective herbicide for the control of Wild Oats, Paradoxa Grass, Canary Grass and Annual Ryegrass in Wheat crops.

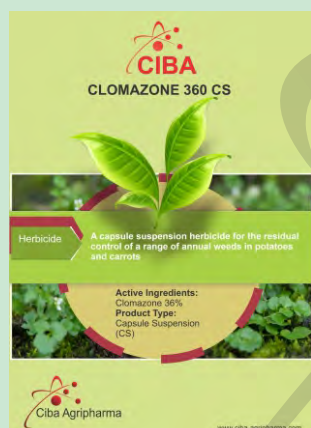

Active Ingredients: Clodinafop-Propargyl 24%
Product Type: Emulsifiable Concentrate (EC)

CIBA CLOMAZONE 360 CS

A capsule suspension herbicide for the residual control of a range of annual weeds in potatoes and carrots.

Active Ingredients: Clomazone 36%
Product Type: Capsule Suspension (CS)

CIBA DESIPHAM PLUS 274 EC

A selective post-emergence herbicide for the control of broad-leaved weeds in Beet crops.

Active Ingredients:
Desmedipham 71 g/L +
Phenmedipham 91 g/L +
Ethofumesate 112 g/L
Product Type: Emulsifiable Concentrate (EC)

CIBA ETHOFUMESATE 500 SC

A herbicide for the control of annual grass and broad-leaved weeds in sugar beet, fodder beet, red beet and mangels and in amenity grassland.

Active Ingredients: Ethofumesate 50%
Product Type: Suspension Concentrate (SC)

CIBA GLYPHOSATE 360 SL

A post-emergence non-selective herbicide, It controls a wide range of annual, perennial grasses and broad-leaf weeds, sedges, Rubus sp., Bracken ferns and brushwoods...

Active Ingredients: Glyphosate 36%
Product Type: Soluble concentrate (SL)

CIBA METRIBUZIN 600 SC

A Selective herbicide for pre-emergence and post-emergence weed control in potatoes and tomatoes.

Active Ingredients: Metribuzin 60%
Product Type: Suspension concentrate (SC)

CIBA MIX

A Sulfonylurea selective herbicide, for the post-emergence control of Wild Oats and Annual Phalaris and suppression of Brome grass, Barley grass and Annual ryegrass in Wheat

Active Ingredients:
Mesosulfuron Methyl 10g/l
+ Iodosulfuron-methyl 2g/l
+ Mefenpyr- Diethyl 30g/l
Product Type: Oil Dispersion (OD)

CIBA MIX EXTRA

A post-emergence contact and residual herbicide for the control of a wide range of broad-leaved weeds and meadow grasses in winter wheat.

Active Ingredients:
 Mesosulfuron Methyl 7.5g/l
 + Iodosulfuron-methyl 2.5g/l
 + Mefenpyr- Diethyl 22.5g/l
 + Diflufenican 50g/l
 Product Type: Oil Dispersion (OD)

CIBA PARAQUAT 276 SL

A liquid total post-emergence weed-killer to be used in crops such as Fruit trees, Citrus trees, Vineyards, Vegetables and Ornamentals.

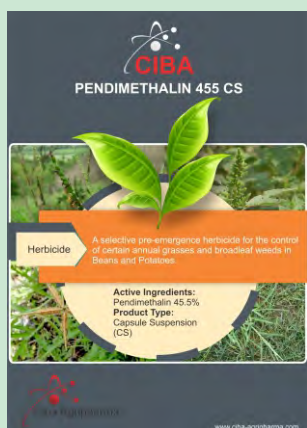

Active Ingredients: Paraquat dichloride 27.6%
 Product Type: Soluble Concentrate (SL)

CIBA PENDIMETHALIN 455 CS

A selective pre-emergence herbicide for the control of certain annual grasses and broadleaf weeds in Beans and Potatoes.

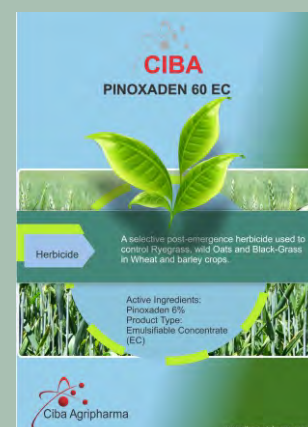

Active Ingredients: Pendimethalin 45.5%
 Product Type: Capsule Suspension (CS)

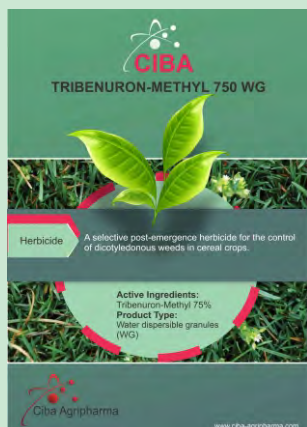

CIBA PINOXADEN 60 EC

A selective post-emergence herbicide for the control Ryegrass, wild Oats and Black-Grass in Wheat and barley crops.

Active Ingredients: Pinoxaden 6%
 Product Type: Emulsifiable Concentrate (EC)

CIBA TRIBENURON-METHYL 750 WG

A selective post-emergence herbicide for the control of dicotyledonous weeds in cereal crops.

Active Ingredients: Tribenuron-Methyl 75%
Product Type: Water dispersible granules (WG)

CIBA RANGER EC

A selective post-emergence herbicide used to control many annual broad-leaved weeds in sugar beet, fodder beet and mangels.

Active Ingredients: Phenmedipham 160 g/L+Desmedipham 160 g/L
Product Type: Emulsifiable Concentrate (EC)

CIBA RIMSULFURON 250 WDG

A water dispersible granule formulation for the control of certain broad-leaved weeds in potatoes and forage maize.

Active Ingredients: Rimsulfuron 25%
Product Type: water dispersible granules (WDG)

CIBA DAZOMET 980 G

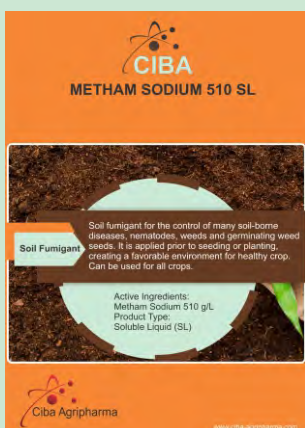

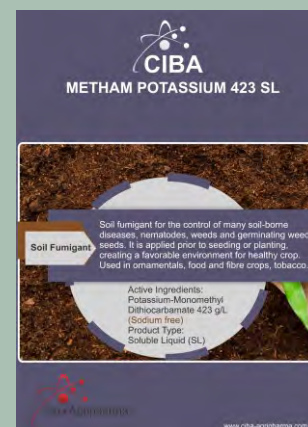

A granular soil fumigant for the control of nematodes, soil inhabiting insects, soil fungi and germinating seeds of weeds. It is also used as a wood preservative for the control of insects, termites and fungi inside wood products.

Active Ingredients: Dazomet 980 g/kg
Product Type: Granules (G)

CIBA METHAM POTASSIUM 423 SL

Soil fumigant for the control of many soil-borne diseases, nematodes, weeds and germinating weed seeds. It is applied prior to seeding or planting, creating a favorable environment for healthy crop. Used in ornamentals, food and fibre crops, tobacco...

Active Ingredients: Potassium-Monomethyl Dithiocarbamate 423 g/L
(Sodium free)
Product Type: Soluble Liquid (SL)

CIBA METHAM SODIUM 510 SL

Soil fumigant for the control of many soil-borne diseases, nematodes, weeds and germinating weed seeds. It is applied prior to seeding or planting, creating a favorable environment for healthy crop. Can be used for all crops.

Active Ingredients: Metham Sodium 510 g/L
Product Type: Soluble Liquid (SL)

Fertilizers

CIBA 0-0-15

A highly concentrated, water-based solution that helps correct or prevent potassium deficiencies. Effective at much lower rates than conventional potassium sources, it maximizes yield. Designed for fertigation or soil application. Recommended on all agricultural and horticultural crops.

N: 0 P: 0 K: 15

CIBA 5-5-40+14.5 S

A special powder fertilizer with high content of potassium for the nutrition and protection of tomatoes and other fruits and vegetables.

N: 5% P: 5% K: 40% +S: 14.5%

CIBA 10-30

A water-based solution with high phosphate and moderate nitrogen demand. for usage on soils with low phosphate availability or plants with high P demand. Recommended on all agricultural and horticultural crops.

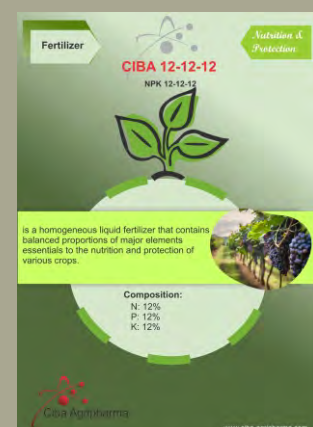

N: 10 P: 30 K: 0 +3% ZINC

CIBA 12-12-12

A homogeneous liquid fertilizer that contains balanced proportions of major elements essentials to the nutrition and protection of various crops.

Composition: N:12% P:12% K:12%

CIBA NPK 14-23-14+TE

A highly soluble compound fertilizer with micro-elements in chelated form suitable for drip irrigation as well as foliar application. To be applied to vegetables and fruit crops.

N: 14% P: 23% K: 14%

+ Trace-elements.

CIBA NPK 15-30-15+TE

A highly soluble compound fertilizer with micro-elements in chelated form suitable for drip irrigation as well as foliar application. To be applied to vegetables and fruit crops.

N: 15% P: 30% K: 15%

+ Trace-elements.

CIBA NPK 16-08-24 +TE

A 100% soluble compound fertilizer with high potassium formula and chelated micro-elements, suitable for drip irrigation and foliar application. to be applied to all vegetables and fruit crops.

N: 16% P: 08% K: 24% + TE, Sulfur: 8.8%

CIBA 18-18-18+TE

A water soluble NPK compound fertilizer in powder form with balanced nutrient ratio and chelated micro-elements and a good ratio of sulfur suitable for all Vegetable, fruit and field crops.

N: 18 P: 18% K: 18%

+TE (sulfur 5.55%)

CIBA 19-19-19 + 6.5 S

A water soluble NPK compound fertilizer in powder form with balanced nutrient ratio and a good ratio of sulfur, suitable for all Vegetable, fruit and field crops.

N: 19% P: 19% K: 19%
+ 6.5% Sulfur

CIBA 20-20-20 + TE

A water soluble NPK compound fertilizer in powder form with balanced nutrient ratio and chelated trace elements. To be used during vegetative growth and early production stages. Suitable for all Vegetable, fruit and field crops.

N: 20% P: 20% K: 20% + TE

CIBA BORON ETHANOLAMINE 12% L

A water-soluble suspension of 12% Boron-Ethanolamine quickly absorbed and assimilated by the crop. Its stimulates growth and promotes calcium mobility and assimilation. It is used to prevent /correct alterations caused by deficiency or imbalance in the assimilation of this micro-nutrient.

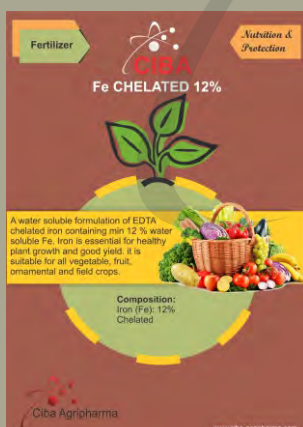

Boron -Ethanolamine 12% Liquid

CIBA Fe CHELATED 12%

A water soluble formulation of EDTA chelated iron containing min 12 % water soluble Fe. Iron is essential for healthy plant growth and good yield. it is Suitable for all vegetable, fruit ornamental and field crops.

Iron (Fe): 12% Chelated

CIBA Mn CHELATED 12%

A water soluble formulation of EDTA chelated Mn containing min 12 % Mn. Manganese is an essential nutrient for plants, it promotes healthy and faster growth and increases the chlorophyll synthesis which results in higher yield. It also increases the availability of P and CA.

Chelated Manganese (Mn): 12%

CIBA NUTRIGOLD

A Superior quality liquid Fertilizer with high phosphate ratio. Used on soils with low phosphate availability or plants with high P demand. Recommended on all agricultural and horticultural crops especially vegetables and banana.

Composition: N: 5% P:75% K:3%

CIBA PK

A specialized compound liquid fertilizer containing phosphorous and potassium in a high absorption form, works by strengthening the root system and improving fruit size and quality.

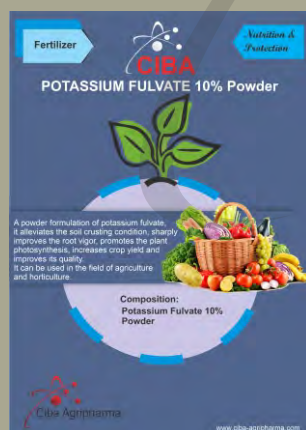

Composition: P:28% K:42%

CIBA POTASSIUM FULVATE 10% Powder

A powder formulation of potassium fulvate, it alleviates the soil crusting condition, sharply improves the root vigor, promotes the plant photosynthesis, increases crop yield and improves its quality. It can be used in the field of agriculture and horticulture.

Potassium K2O 10% Powder

CIBA POTASSIUM HUMATE 10% Liquid

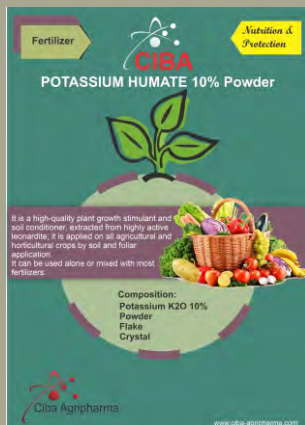

It is a high-quality plant growth stimulant and soil conditioner, extracted from highly active leonardite; it is applied on all agricultural and horticultural crops by soil and foliar application. It can be used alone or mixed with most fertilizers.

Potassium K2O 10% Liquid

CIBA POTASSIUM HUMATE 10% Powder

It is a high-quality plant growth stimulant and soil conditioner, extracted from highly active leonardite; it is applied on all agricultural and horticultural crops by soil and foliar application. It can be used alone or mixed with most fertilizers.

Potassium K2O 10% Powder, Flake, Crystal

CIBA TE MIX LIQUID

A trace elements mixture, with a balanced formula, that keeps nutritional balance and correct trace elements deficiency states. It is quickly absorbed and assimilated by the crop increasing their potential and leads to healthier, richer yields.

Trace Element mixture Liquid
(Fe: 0.5%, Mn: 0.5%, Zn: 0.5%, Cu: 0.5%, S: 1%)

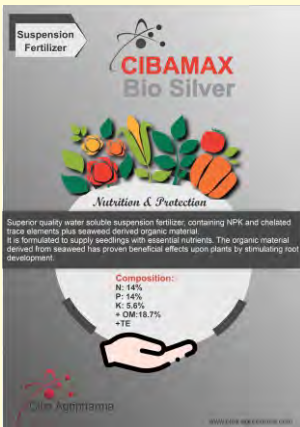

CIBA Zn CHELATED 12%

A water soluble formulation of EDTA chelated Zinc containing min 12 % Zn, used to overcome Zinc deficiency in plants as well as a source of Zinc promoting healthy growth and higher yields. Recommended on all agricultural and horticultural crops.

ZINC EDTA 12%

Fertilizers

CIBAMAX BIO SILVER

A superior quality water soluble suspension fertilizer, containing NPK and chelated trace elements plus seaweed derived organic material. It is formulated to supply seedlings with essential nutrients. The organic material derived from seaweed has proven beneficial effects upon plants by stimulating root development.

Composition: N: 14%, P: 14%, K: 5.6%, + OM: 18.7%, + TE

CIBAMAX CALIBOR

A superior quality, highly concentrated foliar fertilizer, containing Calcium, Boron and Nitrogen. Its special formulation improves set of buds, flower and fruits and increases crop's resistance to disease and prolongs shelf-life. Can be applied to all crops: Apples, Grain, Legumes, Maize, Wheat, Cotton, Citrus, Mangoes, Melons, Pomegranates, Watermelons, Grapes, Cucurbits, Potatoes, Strawberries & Vines...

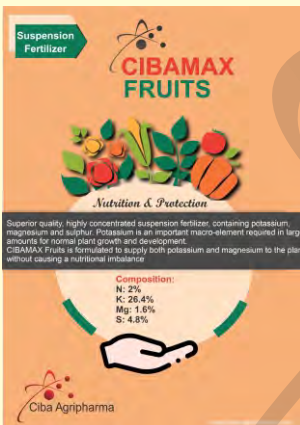

Composition: CaO: 10.0±3%, B: 2.0±0.5%, N: 7.5 ±0.5%

CIBAMAX FRUITS

A Superior quality, highly concentrated suspension fertilizer, containing potassium, magnesium and sulphur. Potassium is an important macro-element required in large amounts for normal plant growth and development. CIBAMAX Fruits is formulated to supply both potassium and magnesium to the plant without causing a nutritional imbalance.

Composition: N: 2%, K: 26.4%, Mg: 1.6%, S: 4.8%

CIBAMAX GOLD

A Superior quality, unique water soluble suspension fertilizer, containing high Calcium and Nitrogen ratio with a balanced chelated range of micro-elements and amino acids. It corrects calcium deficiency, improves fruit set, increases yield and helps improve firmness, storability and color in a wide range of fruits and vegetables.

COMPOSITION: CaO: 15%, N: 10%, + TE, + Amino acids

Fertilizers

CIBAMAX MG

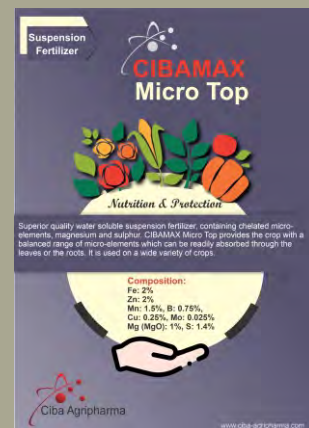

Superior quality water soluble single-nutrient fertilizer, containing the element Magnesium. It is used to correct and prevent Mg deficiency. Magnesium is an essential plant nutrient and is integral to chlorophyll molecules and enzyme processes within the plant. Can be applied to all crops; field crop, berry crop, vegetables, fruit tree, ornamentals...

Composition: Mg: 27.86%

CIBAMAX MICRO TOP

A superior quality water soluble suspension fertilizer, containing chelated micro-elements, magnesium and sulphur. CIBAMAX Micro Top provides the crop with a balanced range of micro-elements which can be readily absorbed through the leaves or the roots. It is used on a wide variety of crops.

**Composition: Fe: 2%, Zn: 2%, Mn: 1.5%, B: 0.75%,
Cu: 0.25%, Mo: 0.025%, Mg (MgO): 1%, S: 1.4%**

CIBAMAX ZN TOP

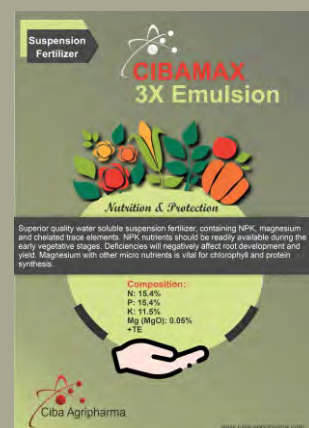

A superior quality water soluble suspension fertilizer, containing high Zinc concentration and a natural bio-stimulant derived from seaweed. It is used for seed treatment. The optimum level of zinc provides protein and enzyme production as for the seaweed, it stimulates rapid root development. The dual composition allows the crop to rapidly take up water and nutrients.

**Composition: Zn: 40.5%
Natural bio-stimulant: 20%**

CIBAMAX 3X EMULSION

A superior quality water soluble suspension fertilizer, containing NPK, magnesium and chelated trace elements. NPK nutrients should be readily available during the early vegetative stages. Deficiencies will negatively affect root development and yield. Magnesium with other micro-nutrients is vital for chlorophyll and protein synthesis.

**Composition: N: 15.4%, P: 15.4%, K: 11.5%
Mg (MgO): 0.05%+TE**

CIBAMAX 00-52-34

Superior quality, suspension concentrate fertilizer, containing high phosphorus and potassium content plus chelated trace elements. Can be applied to all fruits and vegetables: strawberries, melons, mangoes, grapes, pomegranate, tomatoes, peppers, cereals, roses, ornamentals, etc...

MKP- Monopotassium Phosphate
N: 00, P: 52, K: 34 +Te

CIBAMAX 12-61-00

Superior quality, suspension concentrate fertilizer, containing high Phosphorus content and adequate amount of Nitrogen. Can be applied to all fruits, vegetables and other crops: strawberries, melons, mangoes, grapes, pomegranate, tomatoes, peppers, cereals, corn, pulses, cotton, sunflower, mustard, roses, ornamentals, etc...

MAP- Monoammonium Phosphate
N: 12, P: 61, K: 00

CIBAMAX 13-00-45

Superior quality, suspension concentrate fertilizer, containing macronutrients and chelated micronutrients. It has high potassium content and adequate Nitrogen rate plus magnesium with other essential micronutrients in chelated form. Can be applied to all fruits and vegetables.

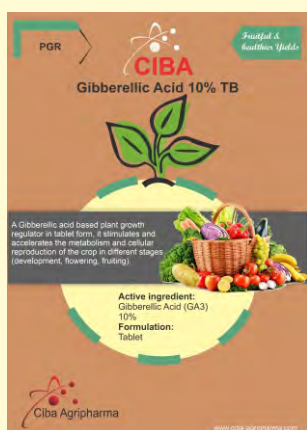

Potassium Nitrate
N: 13, P: 00, K: 45 +Mg +Te

CIBAMAX 18-46-00

Superior quality, suspension concentrate fertilizer, containing nitrogen, high phosphorus content and micronutrients in chelated form. Can be applied to all fruits, vegetables and other crops: strawberries, melons, mangoes, grapes, pomegranate, tomatoes, peppers, cereals, corn, pulses, cotton, sunflower, mustard, roses, ornamentals, etc...

DAP-Di-Ammonium phosphate
N: 18, P: 46, K: 00 +Te

CIBA Gibberellic Acid 10% TB

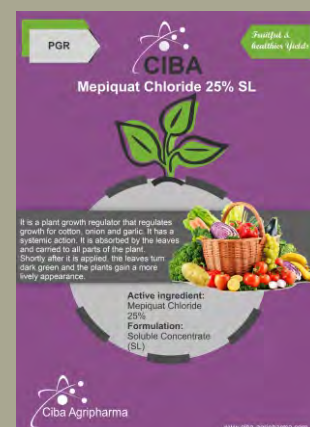

A Gibberellic acid based plant growth regulator in tablet form, it stimulates and accelerates the metabolism and cellular reproduction of the crop in different stages (development, flowering, fruiting).

Active ingredient: Gibberellic Acid (GA3)10%
Formulation: Tablet

CIBA Mepiquat Chloride 25% SL

It is a plant growth regulator that regulates growth for cotton, onion and garlic. It has a systemic action. It is absorbed by the leaves and carried to all parts of the plant. Shortly after it is applied, the leaves turn dark green and the plants gain a more lively appearance.

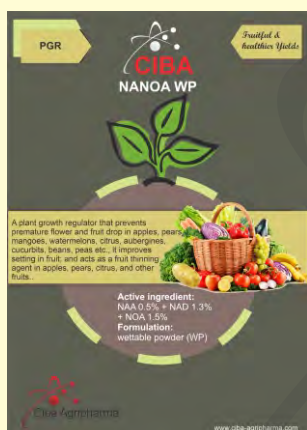

Active ingredient: Mepiquat Chloride 25%
Formulation: Soluble Concentrate (SL)

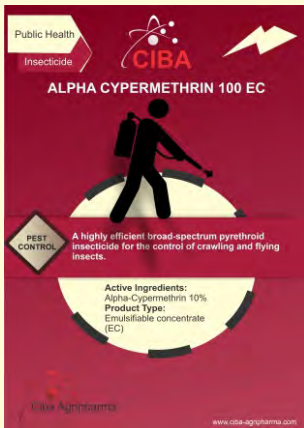

CIBA NANO A WP

A plant growth regulator that prevents premature flower and fruit drop in apples, pears, mangoes, watermelons, citrus, aubergines, cucurbits, beans, peas etc.; it improves setting in fruit; and acts as a fruit thinning agent in apples, pears, citrus, and other fruits..

Active ingredient:
NAA 0.5% + NAD 1.3% + NOA 1.5%
Formulation: wettable powder (WP)

CIBA ALPHA CYPERMETHRIN 100 EC

A highly efficient broad-spectrum pyrethroid insecticide for the control of crawling and flying insects.

Active Ingredients: Alpha-Cypermethrin 10%
Product Type: Emulsifiable Concentrate (EC)

CIBA ALPHA CYPERMETHRIN 100 SC

A high performance, residual insecticide for the control of mosquitoes, houseflies and cockroaches for longer duration. It is suitable for use in domestic and institutional premises & public buildings. It is of low toxicity to humans.

Active Ingredients: Alpha-Cypermethrin 10%
Product Type: Suspension Concentrate (SC)

CIBA ALPHA CYPERMETHRIN 250 WP

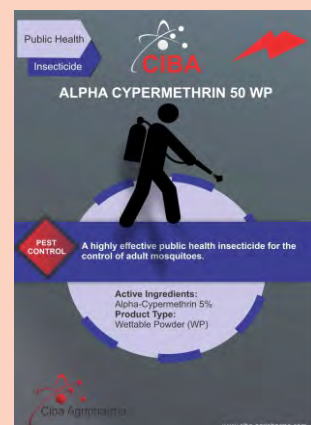

A highly effective public health insecticide for the control of adult mosquitoes.

Active Ingredients: Alpha-Cypermethrin 25%
Product Type: Wettable Powder (WP)

CIBA ALPHA CYPERMETHRIN 50 WP

A highly effective public health insecticide for the control of adult mosquitoes.

Active Ingredients: Alpha-Cypermethrin 5%
Product Type: Wettable Powder (WP)

CIBA BIFENTHRIN 100 WP

A potent pyrethroid insecticide based on the active Bifenthrin for the control of mosquitoes and other flying and crawling insects.

Active Ingredients: Bifenthrin 10%
Product Type: Wettable powder (WP)

CIBA DELTAMETHRIN 25 SC

A highly effective, broad-spectrum contact insecticide with stomach action for the control of various household pests.

Active Ingredients: Deltamethrin 2.5%
Product Type: Suspension Concentrate (SC)

CIBA DELTAMETHRIN 25 WP

A synthetic pyrethroid insecticide with long lasting, residual effect for the control of flying and crawling insects especially Mosquitoes.

Active Ingredients: Deltamethrin 2.5%
Product Type: Wettable Powder (WP)
